

RISHABH NAMA

Cloud Security Engineer | M.Eng. Cybersecurity | AWS · Azure · GCP · DevSecOps · Zero Trust
rishabh@terpmail.umd.edu · +1 (240) 501-4972 · linkedin.com/in/rishabhnama · github.com/rishabhnama

M.Eng. Cybersecurity graduate (University of Maryland, GPA 3.45) and certified Cloud Security expert (CompTIA Security+, AZ-900). Proven track record of securing enterprise infrastructure across AWS, Azure, and GCP. Specialized in designing Zero Trust architectures, enforcing least privilege IAM policies, and integrating automated SAST/DAST gating into CI/CD pipelines. Adept at driving comprehensive risk assessments aligned with NIST CSF and CIS Benchmarks, mitigating critical cloud misconfigurations, and developing robust incident response playbooks using Splunk, Python, and SOAR automation.

TECHNICAL SKILLS

Cloud & Infrastructure Security: AWS (CloudTrail, Security Hub, IAM, VPC), Azure AD, GCP, Zero Trust Architecture, IaaS Security.

DevSecOps & CI/CD: Kubernetes, Docker, Helm, Terraform, GitHub Actions, Jenkins, HashiCorp Vault, Snyk, SonarQube.

Threat Detection & IR: Splunk, SOAR Playbooks, MITRE ATT&CK, Cyber Kill Chain, Wireshark, Endpoint Security (Cisco EDR).

Compliance & GRC: NIST CSF, CIS Benchmarks, ISO/IEC 27001, FedRAMP, SOC 2, HIPAA, PCI-DSS, Risk Analysis.

Scripting & Tooling: Python, Bash, PowerShell, Nmap, Metasploit, OWASP ZAP, sqlmap, Mimikatz, FTK, Autopsy.

EXPERIENCE

Cloud Security Engineer

July 2025 – Present

Saayam for All — Remote, USA | Incident Response · GRC · Splunk · Python · MITRE ATT&CK

- Execute comprehensive cloud security assessments across AWS, Azure, and GCP, auditing architecture designs, IAM configurations, API controls, and deployment patterns against CIS Benchmarks and NIST CSF.
- Proactively identify and remediate critical misconfigurations and attack paths by executing phishing simulations, PowerShell abuse, and privilege escalation techniques across Windows/Linux endpoints.
- Architect and deploy an advanced security triage pipeline, ingesting real-time event telemetry from Windows Event Logs, Linux auditd, and AWS CloudTrail into a centralized Splunk SIEM.
- Develop automated SOAR playbooks utilizing Python and Bash to detect suspicious TTPs mapped to the MITRE ATT&CK framework, accelerating the containment of known bad IPs and privilege escalations, reducing total incident triage time by 40%.
- Author formal Incident Response (IR) documentation detailing root cause analysis, containment strategies, and long-term cloud mitigation recommendations for executive stakeholders.

DevSecOps & Cloud Engineer

Apr 2022 – Aug 2022

Codemancers Technologies — Bangalore, India | AWS · Kubernetes · Zero Trust · HashiCorp Vault

- Hardened high-availability cloud infrastructure, configuring secure VPCs and deploying least privilege IAM policies for 3 major fintech clients, effectively reducing the organizational attack surface by 35% through Zero Trust Architecture.
- Engineered robust CI/CD pipelines via GitHub Actions and Jenkins for 50+ microservices, integrating mandatory SAST/DAST, Terraform IaC validation, and container vulnerability scanning using Snyk and SonarQube, boosting compliance by 30%.
- Automated dynamic secret injection and centralized monitoring using HashiCorp Vault across 6+ Linux servers and 24+ Kubernetes clusters, utilizing Prometheus-Grafana to reduce system downtime by 33%.
- Deployed secure, containerized microservices in production AWS environments utilizing Docker, Kubernetes, Helm, and Nginx.

AI SECURITY & THREAT DETECTION PROJECTS

Enterprise Insider Threat Detection System | Python · Graph Neural Networks · Matplotlib

2024 - Present

M.Eng. Capstone — University of Maryland

- Built an advanced machine learning detection engine using Python, improving insider threat identification accuracy by 38% through the analysis of the CERT dataset.
- Modeled complex user interactions—including logins, emails, and file/device access—as graphs to capture subtle behavioral patterns across entities.
- Trained a specialized Graph Neural Network to detect anomalies, enhancing the identification of high-risk insiders with low false-positive rates, and visualized security insights using Matplotlib for SOC analysts.

EDUCATION

M.Eng. in Cybersecurity — GPA: 3.45 | University of Maryland, College Park

Aug 2023 – May 2025

B.Tech. in Computer Science & Engineering — GPA: 3.53 | N.B. Navale Sinhgad College

Aug 2017 – May 2022

CERTIFICATIONS

CompTIA Security+ · Cisco Certified Ethical Hacker · Microsoft Azure Fundamentals (AZ-900) · Splunk Fundamentals-I · IBM Cybersecurity Professional Certificate
